

# Sandra Smith

Agriculture & Forestry Coordinator  
Potomac State College of WVU

The first lesson that I teach in my freshman Introduction to Animal Science college class is about Agriculture. Agriculture is the oldest and most important of all the sciences. Without a sound basis of agricultural knowledge, all humans would be struggling to find enough food, shelter and clothing to be able to live.

As a woman in Agriculture, I want to pass my knowledge and passion for the profession on to the next generation.
