## How has being a woman in Agriculture helped you succeed in life?

Being a woman involved in agriculture has been a fulfillment of my childhood dream. Agriculture has allowed me to take care of my family, as well as given me the opportunity to raise my children on the family farm. It is very satisfying to know that I am doing my part in feeding the world, if only in a small way. I feel that taking care of the land and animals that God created has taught me to have patience and respect for all living things.

It has enriched my life to the fullest. I feel very blessed that my life has been both gratifying and successful when I see that my sons have grown up to be loved and respected in the communities in which they live.
